# Aerobu deco cushion

Aerobu® deco cushion is technologically advanced and versatile pillow. It utilizes a filler material called Nano Trillium fiber, which is a nano polyester fill designed to replicate the characteristics of natural synthetic down. This means that the pillow aims to provide similar comfort and softness as down feathers, making it a cozy option for users.

One of the key features of Nano Trillium fiber is its anti-microbial and fungus protection properties. This means that the material is designed to resist the growth of bacteria and fungi, which is especially beneficial for outdoor use where cushions may be exposed to various environmental conditions. The anti-microbial protection also makes it a suitable option for indoor use, where it can help maintain a hygienic environment.

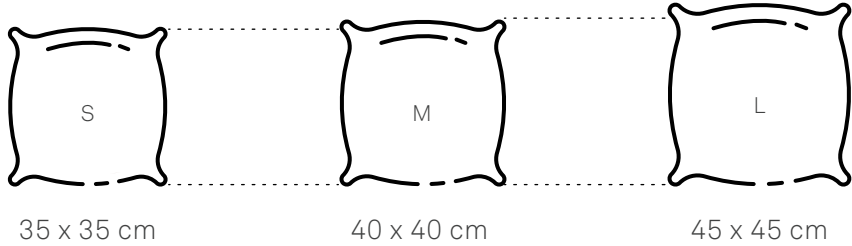

Double Seams

Size Availbale :  
35x35 cm | 40x40 cm | 45x45 cm

Sense of comfort :

Soft

Hard

## EASY MAINTENANCE

Spray on a cleaning solution of water and mild soap.

Use a soft bristle brush to clean.

Rinse thoroughly until all soap residue is removed.
