

 Aerobu Custom Cushions

# OUTDOOR

TYPE	LAYER & FILLER		IMAGE	ADVANTAGE
Seat	Multi layer	Multi layer QDF, Poly-wrap, fiber fill on top		The <b>Aerobu</b> multilayer construction offers the most luxurious and sophisticated seating experience for outdoor deep seating. By combining softer foam on top and firmer Urecel Quickdry foam on the bottom while ensuring quick-drying properties, the Aerobu multilayer construction will outlast any other outdoor cushions in the market.
	Single	Single layer QDF, Poly-wrap		The <b>Aerobu</b> Single layer Construction provides full outdoor performance from Urecel Quickdry and its durability. It is more economical than the multilayer construction. Please refer to the Aerobu guideline for choosing the right hardness for your cushions.
	Eco	QDF+Vertical fiber		Aerobu Eco-layer uses the new Vertical Fiber layer + <b>Urecel QuickDry</b> foam, which dries faster than normal foams and provides medium to long-term durability. Additionally, the Vertical Fiber layer is made of 100% recycled plastics.
Back	Multi layer	Multi layer QDF, Poly-wrap, fiber fill on front		Aerobu combines <b>Urecel QuickDry</b> foam, Vertical fiber and fiber fill to create more sophisticated feel for the back cushions. This provides more luxurious feel and fit for the back cushions.
Fiber-fill		Full Nano Trillium-feel fiber Full Pearl fiber Blend Trillium + Pearl fiber Full Mix crush		a) Trillium-feel: Nano-grade fiber fill with a waterproof lining and ventilation provides the softest and most luxurious feel for the back and deco cushions for your outdoor furniture. The Trillium feel can be mixed with Pearl fiber in the ratio of 30:70 or 50:50. b) Pearl fiber: Pearl-shaped polyester fiber will keep the cushion shape for longer and provide faster drying performance.
	Vertical Fiber	Single layer Vertical fiber + Poly-wrap		<b>Aerobu</b> Eco-layer uses the new Vertical Fiber layer, which dries faster than normal foams and provides medium to long-term durability. Additionally, the Vertical Fiber layer is made of 100% recycled plastics.

## 1. Foams

### a) Urecel QuickDry Foams (UQD)

Urecel QuickDry® is open-cell structure foam produced by a sophisticated process called Hydro-Blast Reticulation.

[www.urecelquickdry.com](http://www.urecelquickdry.com)

### b) Urecel Endura Foams (UEF)

Anti-microbial indoor foams with high resiliency and durability

[www.endurafoam.com](http://www.endurafoam.com)

### c) Rebonded

The best outdoor performance foam reborn. We granulate and re-foam the URECEL QDF by using heat and high pressure to produce hard and durable foam. It still maintains quick-drying properties and antimicrobial resistance just like QDF. Comes with density of 60, 80 and 100kg/cbm and it is perfect to wrap around the upholstery frames and also used for base of deep seat cushions. No wastage and good for environment.

## 2. Vertical Fiber Pad (VFP)

Vertically constructed densified polyester pads which allows the water to dry faster with enhanced durability. 100% recycled from waste water bottles

**3. Polywrap (Dacron)**

Siliconized fiber with 100% recycled from waste water bottles

**4. Pearl fiber pillow top**

Siliconized fiber pillow top that helps to soften and puff up the cushion

**5. Water proof lining**

Water repellent nylon/polyester lining

**6. Nylon Tricot mesh**

Allows water to drain faster for inner lining

**7. Acrylic Fabric**

Aerobu is a licensed importer of fabrics from Agora, Sunbrella, Perennials and more.  
Also local acrylic fabrics are available such as Regency and Ateja

**8. Olefin Fabric**

Ateja and Regency

**9. Mesh Fabric**

Ateja and Regency

### 10. Poly fiber (100% recycled polyester from waste water bottles)

---

Trillium-feel  
Fiber

Pearl Fiber

Blend Trillium  
+ Pearl fiber

Mix crush

### 11. Thread

---

Serafil and Coats are available

### 12. Zipper

---

YKK and other high quality with different types of slider & zippers are available

CARE INSTRUCTION

**Bleach may be used, in moderation:** chlorine bleach will not affect the coloration of the solution-dyed acrylic fiber and it's for this reason acceptable for stubborn stain removal, including mildew. Chlorine bleach, strong chemicals or detergents will eventually affect the strength of any fiber or cloth, so it is better to use a diluted solution of one part bleach to twenty parts water.

Clean Agora® fabrics with neutral soap in lukewarm water: we recommend to clean at a temperature of no more than 30°

Iron at low temperature

Do not dry-clean

Air dry : do not use a clothes dryer

## Advantage of Multi Layer

### Aerobu cushion

Fiber filling at the top much better recovery after sitting down, pillows don't collapse easily and are able to withstand body weight. With the correct construction it doesn't make the cushion bowing

### Other Cushion

Other cushions with poor construction composition make cushion bowing and collapse easily

# Zipper Construction

Aerobu sets a new standard for zipper construction with protection and curved zippers to prevent damage and longevity

## Selection of fabric

Aerobu developed and has invested in updating high-tech equipment, used to make cut patterns for luxury cushion fabrics. Fabric cutting machine with a computerized system, we make everything precise and precision is our standard.

## Computerized stitching quilting

The luxury of quilting lines on the cushion furniture unite to form a luxurious line on the fabric. Our quilting stitching uses a computerized system so that we can customize according to the requests of our customers.

Computerized Stitching Quilting system

## Computerized stitching quilting

## In-house embroidery

Placement of brand logo embroidery on products, Aerobu can customize logo or text embroidery on cushion products according to customer requests.

Embroidery on product

## Automatic Pillow Felling

Consistency in cushion or pillow filler is important for comfort, here we use a pillow channeling machine that can adjust the weight in filling fiber filler to cushion, so the taste remains consistent and doesn't change from one product to another.
