

Aerobu Custom Cushions

The advantages of Aerobu Cushion

C. Selection of fabric

Aerobu has invested in high-tech equipment for fabric cutting, which uses a computerized system to ensure precise and accurate cuts for luxury cushion fabrics. This will help to reduce consumption and provide more accurate patterns.

D. Zipper Construction

Aerobu sets a new standard for zipper construction with protection and curved zippers to prevent damage and improve aesthetics and longevity.

E. Square pattern pillow

Round Square pattern deco cushions
Aerobu pattern expert styled the aerobu deco cushions with high end luxury round square shape instead of curved pointy shape.

F. Inner Deco Cushion

Ball Fiber Filler

Nano Trillium Fiber Filler

Inner-liner water resistant
mould free

Nylon tricot mesh for
ventilation & drainage

Zipper YKK with different
types of slider & zippers

G. Computerized stitching quilting

Our cushions feature luxurious quilting lines that create a sophisticated look on the fabric. Using a computerized system, we can customize the quilting stitching to meet the specific requests of our customers.

I. In-house embroidery

The placement of brand logos or text embroidery on our cushion products at Aerobu Custom Cushions can be fully customized according to the customer's specific requests. Our team can work with you to determine the best location and size for your embroidery to ensure it complements the overall design of your outdoor furniture.

J. Automatic Pillow Filling

Consistency in cushion and pillow fill is essential for maintaining comfort over time. At Aerobu Custom Cushions, we use a pillow channeling machine that allows us to adjust the weight of filling fiber to ensure consistent texture and density across all of our products. This way, you can trust that your cushions and pillows will maintain their shape and feel the same, no matter which product you choose.

L. Ball-fiber layer

Siliconized fiber pillow top that helps to soften and puff up the cushion, for extra comfort and better recovery

M. Automatic cutting foam

Precision is the main thing, with a cutting machine with a computerized system, the foam that is cut will be according to size and precision.

N. Multi Layer Construction

Aerobu cushion

Aerobu cushions are designed with fiber filling at the top, which provides better recovery after sitting down and prevents the pillows from collapsing easily under body weight. This ensures that the cushion maintains its shape and doesn't bow.

Other Cushion

Other cushions with poor construction composition are more prone to bowing and collapsing easily.

Thank You
